**Attachments:** 190723INDPIERedacted.pdf

Dear Deidre

I hope you're well. Please be advised that the Commission's routine practice when new information becomes available is to publish it on its website as soon as practicable and then provide interested individuals and/or groups seven days in which to provide written comment on that new information. I would anticipate that this will apply to the air quality assessment report once it has been provided to the Commission. The Commission will publish a statement on its website advising of the deadline for written comments.

Regards

**Subject:** Rixs creek continuation project air quality report- Howard Reed Letter 23/7/19

Dear IPCN

Attached letter from Howard Reed to the IPCN, from the IPCN website.  
As the addendum report or assessment report for air quality will not be available until 9th August 2019, this clearly disadvantages the general public and other departments to make clear judgement of the material.

Therefore a request for extension of time to make a submission related to air quality and also the assessment report by the department should be considered at the end of September 2019.

regards  
Deidre
