Hi Dennis

Thank you for enquiring about the issue with commercial-in-confidence nature of the material. There is certainly no issue with the mine plans. In considering further the Agricultural Productivity Assessment, the report discusses the land practices of the current person who agists the property, stocking rates and net income that could be considered commercial in confidence. We would appreciate it if this report is not placed on the website.

Regards

**WE CARE. WE DELIVER.**

Hi Geoff,

Thank you for your email and the additional information. I am confirming receipt of the email and two attachments, and I will pass this onto the Commissioners for their consideration.

I intend to publish both of the mine plan and the agricultural survey onto the website and wanted to confirm this is okay and doesn't contain any commercial-in-confidence material before doing so.

Regards,

**Dennis Lee | Team Leader**

Dear Dennis

Thank you for your email today. We had been aiming for a response to the IPCN today. I note that based on when the planning for the Rix's Creek Continuation Project was undertaken, mine scheduling packages were not as advanced as currently available, the work to generate plans as requested was much more involved than would be the case with contemporary mine planning packages and a digital model is not an option in the timeframe involved. Spatial files can be supplied for the areas depicted in the slides provided.

We have presented the plans for the first 10 years for Option 1 and Option 2. Post this time, the North Pit, South Pit and Western OEA's are all completed and there is no difference between Option 1 and Option 2 from this point.

Please find attached a pdf of a presentation showing year by year comparisons between Option 1 and Option 2. The presentation includes a progressive rehabilitation table for both options with the cumulative rehabilitation totals commencing from the start of the options.

We have had the opportunity to undertake an Agricultural Productivity Assessment of the area of the proposed Western OEA for Option 2. This report is included for information.

Regards

Hi Geoff,

I am following up the email below. Would you please be able to provide this to the Commission Monday 09 September 2019?

Hi Geoff,

Thank you for the update on the air quality addendum and for advising us of the submission to the United Wambo Open Cut Mine Project.

You will remember that the Commission asked at the meeting on 9 July 2019 for information on progressive rehabilitation. You kindly provided some of this information in the response to Commission's queries date 5 August 2019 providing an indication of rehabilitation from 2020 to 2030 in map format for Option 2. The Commission requests more information on this matter. Would Bloomfield please provide for both Option 1 and Option 2:

- Progressive rehabilitation maps (similar to those provided in the additional information) for each of the 21 years of the project. And if the information is readily available, broken down by each stage of rehabilitation (active pit, unshaped, shaped, top soiled, rehabilitated), that would be useful. If this could also be provided in PowerPoint (.pptx) format, it will enable the ability to flick through the slides and quickly see the year on year differences. A digital model showing the rehabilitation progression with the various stages would also be useful if that's was readily available as an output from your mine planning software.
- Progressive rehabilitation tables on each of the plans that shows the spatial area (ha) of rehabilitation progress for each of the rehabilitation areas (Pit 1, Pit 2, Pit 3 etc.) for each year of the project.

If you have any questions about the request, or would like to discuss it further, please feel free to contact me.

Regards,

**Dennis Lee | Team Leader**

**Subject:** Information to the IPCN

Hi Dennis

Please be advised that Bloomfield provided a submission on the United Wambo Open Cut Mine Project in response to the statement issued by the IPCN on 2 August 2019. Bloomfield has also provided to the DPIE the addendum report to the Air Quality assessment for SSD 6300 as requested by DPIE.

We seek confirmation that currently there is no outstanding information requested of Bloomfield by the IPCN.

Regards
