Subject: Extended deadline for submissions on Hills of Gold Wind Farm (SSD-9679)
Date: Thursday, 15 February 2024 4:54:19 PM

Hi

I wish to object to the Hills of Gold Wind Farm (SSD-9679)

Todd middlebrook

[REDACTED]
Nundle nsw 2340

My family's objection centres on the grounds of the increased noise, traffic and obstruction during its proposed construction.

My elderly mother who lives largely independently in the home relies heavily on the essential services available in the Nundle village.

She can only access these and her social connections, that are vital for her well being, via Crawney Road and the village streets that are going to be severely affected by the associated construction traffic.

With the increased daily light traffic movement rising by 35% and the daily incidence of oversized/over mass vehicles being as many as 6/day, this poses a real risk to her well being.

The traffic effectively makes a trip to the village a punishment to run the gauntlet. Travelling from her home to her critical services is a heightened risk and concern for her and family. It needlessly puts her independence under unnecessary pressure.

As well as navigating around these traffic hazards will be the inevitable continuous impost of jarring noise into her abode that will also be a result of these daily industrial grade traffic movements on Crawney Road.

What is meant to be her place for retreat and peaceful living becomes a thoroughfare for noise and a daily assault on her senses.

Thankyou for receiving this objection .

Regards

Todd Middlebrook
