Submission date: 7/30/2024 5:11:12 PM

*I am a mother with three young daughters. I am extremely concerned for my kid's safety in regard to hundreds of trucks and heavy vehicles passing down our small road every day. It is currently so narrow two cars struggle to pass each other and there is clearly a sign stating no trucks allowed over 5T.*

*The consultants have completely disregarded the safety of our children playing up and down Gooromon Ponds Road, riding their horses and riding their bikes to friends and neighboring properties.*

*What will NSW planning ministers and politicians say when a horrible injury occurs due to Wallaroo Solar Farm heavy machinery and vehicles???? Pass on the blame to someone else????*

*Why have they completely ignored these safety issues? Please don't do the same. Think about your children riding their bikes down a small road as trucks up to 4 METRES WIDE and 50 METRES LONG drive down head on with many blind spots and no lights and a steep ditch on each side of the narrow road.*

*Please consider the safety of the locals, our children and our way of life.*

*Thank you*

*I have attached a few photos; one of my daughter on the road to show how narrow it is, one of my daughter waiting for the school bus and one of the blind spot corners on Gooromon Ponds Road to give you a better understanding of the dangers this project will create.*
