Topic 1. Sustainability of current and future forestry operations in NSW

To: The Independent Forestry Panel

13 October 2024

Dear Panel members,

When are these morons going to get it through their thick skulls: You can't keep mowing down native forests without there being draconian outcomes.

Loss of biodiversity, accelerated climate change, increased mental health and alienation problems for humans as we create a world that becomes more and more artificial every day.

Mr Minns is a dope. Says he wants to build more than three hundred thousand new dwellings , many of them nothing more than boxes unsuitable for human habitation , by the end of this decade.

Easy solution: cut immigration.

End all logging of native forests now. Only way to go.

Thank you.
