*Although I object to the proposed development of a plastic recycling facility in Moss Vale for a number of reasons, I focus here on the fact that the very likely event of a fire (fires have occurred recently at Hume in ACT and Smithfield in NSW recycling facilities) will not be responded to or managed effectively, thus putting the community at risk.*

*Local resources will not be enough to deal with what will be a catastrophic event.*

*Recycling plastic is extremely high risk! There is nothing reassuring about Plasrefines record of operation, they appear silent on this matter.*

*As we know, and unfortunately experienced in 2019, the smoke from fires carries and the community will be exposed to the toxic fumes which is simply unacceptable.*

*I urge you not to put our lives at risk by allowing the establishment of this facility.*
