The fact that something like this is even being considered so close to houses and the community is wrong. I worry for the health of all Wingecarribee residents, in particular my children. There would be much better locations for this type of development that would not negatively impact such a wide area. I should have to worry about the water my children drink or the negative impact on their health and hormones. There are professionals telling you this is dangerous and not the right site. Please listen to them!
