Organisation: N/A	Key issues: <i>Social impacts, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/19/2024 4:30:30 PM

I am not against the concept of safe plastics recycling but it must be done in a location that is not damaging to people and community.

The proposed location is WRONG :

- *It is a fundamentally inappropriate site*
- *There is NO buffer zone between the factory and residential buildings*
- *At less than 250metres from houses it is too close to nearby existing houses and schools*
- *100 large truck movement per day will put incredible strains on an already problematic traffic system*
- *280 light truck and staff vehicle movements per day raise concerns about noise, congestion and road safety*
- *The environmental risks are too great. It is located in the catchment for Sydney's drinking water and poses risks of plastic particle pollution for us and the Sydney population. The discharge of microplastic particulant matter into the environment is not detailed and is thus of grave concern.*
- *It endangers water quality, wildlife and public health*
- *It conflicts with the Southern Highlands Innovation Park master plan objectives*
- *It includes two massive buildings one of which is the equivalent to a five story building*
- *I fear the industrial-scale operation will erode the area's rural charm, natural beauty, and tourism appeal*
- *It will damage the economic development in the Highlands*

The health, safety and harmony of a community deserves respect. It is crazy to try and solve one problem by creating another problem. The Government has a duty of care to its citizens and subsequent generations.
