Location: <i>New South Wales 2576</i>	
Attachment: N/A	

Submission date: 11/19/2024 10:56:34 AM

I believe this application to be unsuitable for the chosen site. Its proximity to childcare centres, residential housing and in conflict with councils Southern Highlands Innovation Park (SHIP) plans for this area which is to be an innovative sustainable district. In addition, the increase of trucks per day is absolutely not practicable with residents using these roads, especially children. Another particular concern, and one I am surprised has not prevented the application in the first place is its proximity to creeks/rivers that feed into Sydney Water drinking supply. We are all too familiar with the impact microplastics already has on the health of humans, but also the impact it would have on our aquatic animals like the platypus that reside in these rivers, is likely to be drastic. The road maintenance will be too hard to maintain, dust will impact residents and increased danger on these roads is unacceptable. A facility like this needs to be a further distance from those mentioned above. I hope, with all my heart that this facility is not built here. I am all too familiar with the NIMBY phrase, and this is not a Not in My Back Yard situation, it is just not the right site.

Yours faithfully,

Morwenna Zabaks
