I am objecting to this obscenely large and polluting company to go ahead. How is it possible that our government is permitting a company of questionable origin to develop a company to pollute our drinking water, damage our environment, make those residing and working in the area ill. For example they are advised to spend limited time outdoors ? To go ahead. Also, how is it that the local council are against this project, yet the government can override and allow it. Without any consideration for the residents, the township or the children who are the future of this town.
