I oppose to this submission as it will have a major detrimental impact on the area , community, infrastructure

There are a multitude of other areas that have access to the same highways roads etc and not in such built up and populated area that would be a far better location

The current infrastructure of the area is already struggling with the population growth and this will just tip it over the edge not taking into account the environmental impact as well

It's time for the planning commission to grow a brain cell or 2 and look at long term impacts
