I am very concerned about the proposed Plasrefine factory that is proposed to be built very close to our house

**The microplastics and pfas are going to pollute the clean air we breathe and the water we drink in our water tanks*

**It is way too close to residential areas*

**There is no buffer zone*

**The traffic is going to be heavily affected which is already horrendous*

**The enormous increase in trucks on our roads will decrease the already appalling road conditions*

**We should be able to live free, healthy and happy but this factory is going to negatively impact our healthy lifestyle*

**Such a heavy industrial factory should not be able to be built on this site*
