This development application makes no sense whatsoever.

The company doesnt have any expertise in this field.

The access roads cannot support the enormouse increase in traffice by large trucks.

Devastating impact on the rural landscape to have such a large processing facility plonked down amongst the rolling hills.

Impact on air quality, water quality and increase in noise pollution. Increase in the water needed to run the facility.

Definitely more detrimental aspects to this propsal than positive ones. I understand the need for recylcing of plastics but do not agree that this is the way forward, there are too many concerns with this facility being lobbed into this location.

Council is not in favour of the proposal.

WHY ruin a naturally beautiful area trying to solve a long term problem of reducing waste!!! It just doesnt make sense.
