This is not the right site for Plastics Recycling Facility because:

- the location feeds into the local reservoir and Sydney's drinking water supply.*
- is located too close to childcare facilities and residential houses.*
- microplastic emissions and the negative impact on the air, water and soil. This impacts residents and farmers whose supply their produce to regional areas and Sydney.*
- there is inadequate local infrastructure to deal with any fires caused by refinery.*
- the negative impact on traffic volumes in Moss Vale and all surrounding towns.*
- the negative impact on the Southern Highlands tourism economy. Visitors don't want to experience high traffic and air pollution when they visit regional areas such as Southern Highlands.*

Do not build the Plastics Recycling Facility in Moss Vale. This is not the right site.
