Organisation: N/A	Key issues: <i>Social impacts, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/23/2024 12:45:59 PM

*As a resident of Moss Vale for over 10 years, I would like to add my voice to the widespread objections to the Plasrefine plastics reprocessing facility planned here. My objection is based on the following issues:*

- Microplastics are a huge issue for the world & this will add to them in our locality*
- The facility will risk polluting our waterways & drinking water (& Sydney's)*
- 100 large truck movements every day will clog Moss Vale's already choked road system - rush hours are a nightmare already*
- The site is far too close to residential properties (only 200M), schools & the Australian BioResources facility. Residents will be severely affected 24/7 by pollution, noise & risk of chemical fires.*
- There will be significant loss of biodiversity, including threatened species such as the micro bat & platypus.*

*There are many other reasons that have been voiced by many others as to why this development should not be allowed in our country town & I support these without repeating them here.*

*In summary, I strongly believe that this development is totally inappropriate for Moss Vale & should be rejected.*

*Ron Cumberland*
