As someone who live less then 1km from where this site is and As a mother of small children, this proposed factory will cause major health concerns for my family. It will force us out of our homes and away from the towns our families have lived for so long.

Can they 100% guarantee that it will not cause pollution to the surrounding homes!! NO they can not.

Would they put this next to their own homes! NO they would not!

Are they going to compensate every single local for the losses they will incur (house value will plummet, bills will go up due to us not being able to have our laundry outside safely, health problems that will be caused!!!

Moss vale is a beautiful country town and this factory will kill the town, it will destroy tourism, they our town relies on

It is absolutely the wrong place to put this factory and if the organizers of it had an ounce of sense they would agree.

They need to ask themselves if they go ahead will they be able to sleep at night knowing that are the direct cause of destroying the lives of 1000's and single handily destroying a popular tourist town all because they selfish greed!!

This factory needs be put far away from peoples homes! or if they want it near home put it next their own house first then see the affects it will have!

HELL NO TO TO PLASREFINE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
