I wish to object against the proposed development going ahead due to the potential value of our property decreasing. It has been evident that other areas in Australia where solar farms have been built, the neighboring properties have decreased in value and impacted the home owners.

The visual landscape and scenic views of muscle creek will be destroyed.

The amount of wildlife habitat that will be destroyed is concerning. Not only the home of the wildlife that live within the boundary, but also other species that migrate through this area.

The glare and reflectivity that that the solar panels will create is also a concern with traffic going through these area's of a day. It can be dangerous and poses safety hazards
