No signage on any of the silos that have been embellished by painted murals. The horizontal conveyor room is clearly seen and the character of the silos remain intact.

Glebe Island Silo Billboard viewed from Glebe Foreshore. The signage structure obliterates the view of the horizontal conveyor room and morphs the silos appearance into a comical resemblance of a bulk carrier atop a faux Grecian monument to the Olympic Games once held. A bulk carrier brought to you by “House of the Dragon” coming soon on Binge!
